# Claudio Brocchini

In his small workshop in the vicinity of Pietrasanta, Claudio Brocchini designs and manufactures floor, ceiling and wall lamps. In his designs he reinterprets pieces of 1950s design and creates an ever growing family of lamps.

His attention to detail and his willingness to accommodate his clients wishes, sets his lamps apart and makes them a particularly rare item.

Get an insight into Claudio Brocchini's family of lamps and in the possibilities of designing your very personal piece. Therefore, you can see every possible variation of lampshade on page 11.

# Chiacchera

The Chiacchera is about 160 cm high but the slender legs, made of brass, can be adjusted. So, the height can vary. Therefore, the Chiacchera can be adjusted perfectly for every room.

## Chiacchera Big

The Chiacchera Big is adjustable as well, but can reach a height of 190 cm so its appearance is even more impressive.

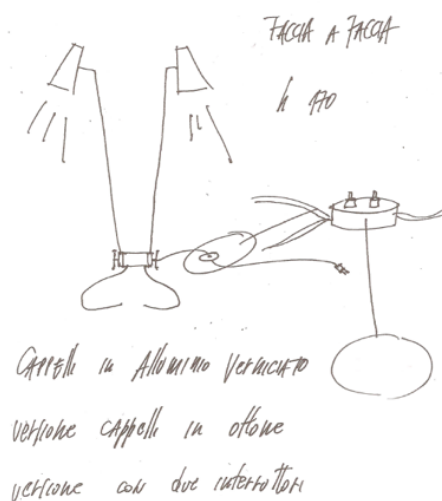

# Tozzo

This elegant model called Tozzo is composed of a stable brass cylinder under the typical, fine curved body, followed by an also typical conical lampshade. All together brings a height of about 150 cm.

# Faccia a Faccia

The Faccia a Faccia is a very fancy lamp. It's a twinlamp, consisting of two slender bodies, that come together at their foot. The bodies are individually adjustable. Due to the various combinations of colours, this lamp can even get more fancy and original.

# Spilungona

The Spilungona is a lamp that is clamped in between floor and ceiling and so enriches every room imposingly and of course this means that the height varies.

# Puntale

The lamp Puntale is a very inventive ceiling light with multiple arms, which have several joints so they can bring the shades in nearly every position and makes it possible to illuminate every room perfectly. Thereby, this lamp can reach a diameter up to 150 cm.

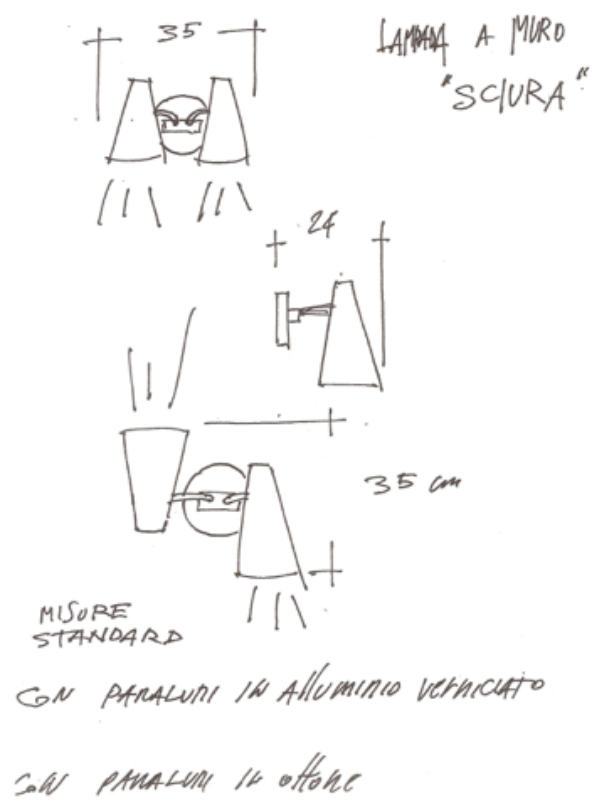

## Solitaria

This lamp is a convertible wall lamp, that can be manufactured ideally for every room. With one or more arms, with or without an outlet and with a length of up to 180 cm.

The Solitaria Semplice ist the shorter alternative and there by the perfect lamp to read whether in your bed- or living room.

## Lampada a Muro „Sciura”

This model is another wall lamp that can be designed very individually for you and your room. With a width of maximum 35 cm and a length of 24 cm it is more compact and rather unobtrusive.

You can see Brocchini's extraordinary quality to accommodate his customers, when you take a look at the wide range of possible colours of the shades. Beside the wide range of RAL colours, which you can see on the next page, Claudio Brocchini manufactures two special lamp shades in his workshop.

The gold-coloured shade of brass, that becomes one unit with the body through uniformity. And the pure aluminium shade, that becomes a very exciting combination with the golden body and light.

## Colours
